

TeQ I.Q. LLC doesn't allow users to make any robo calls if TeQ I.Q. LLC finds a user making Robo Calls we terminate the user immediately and reports them to the FCC.

We make sure prior to Giving Service to a Customer that they Have NOT made any Robo Calls in the Past and WILL NOT in the Future make Robo Calls and Let them Know if they Do in the Future their Service will be Terminated and they will be reported to the FCC!!!

I didn't see the Prior Emails! I am very Sorry for not updating Earlier!

If I would have seen those emails I would have Immediately like I did today updated the Database!

I have a very Small Phone Business and Manually bring on Customers and Personally Vet them to make sure they do NOT do any Robo Calls on my Service!

Can you please add me to the RMD today so my Customers don't lose service tomorrow???
