

MEA Financial is a software provider for Financial Institutions. MEA Financial offers IVR solutions and provides outgoing 2FA Voice Calls for its Online Banking solution. MEA has worked with our service provider to enable STIR/SHAKEN on all numbers that are registered and in use. All of MEA's outgoing call services are actions taken by customer, such as requesting an operator from our IVR solution or requesting a 2FA Voice Call from our Digital Banking solution. MEA plans to continue that implementation moving forward with all outgoing traffic.
