The following steps have made to avoid originating robocall traffic:

1. We have disable the auto dialer feature on our PBX.
2. We don't use or allow any third party auto dialer software.
3. We have limited the number of SIP channels per customer to 5 channels.
4. We also screen the type of businesses our customers have to determine if that business is prone to do robocalls or not. We do not do business with any businesses that uses auto dialers legal or illegal.
5. VoIP Innovations will be providing our STIR/SHAKEN call signing solution
