MSRNE operates a private server hosted with Vitelity Communications, 317 Inverness Way South Ste 140 Englewood, CO 80112. The server is protected with a 16 digit user password and the use of "fail2ban" which locks out an IP address after server failed attempts to access. Handsets attached to this server are secured behind a firewall at each location. We do not provide for automatic handset registration and each phone number, dial plan and sip registered device must be hand entered in the servers program.

Regards,

Kevin Rheaume
