RE: FCC Robocall Mitigation Database – FRN 26462903

To Whom It May Concern,

SequireVoice, a Tech Electronics company, avoids originating illegal robocall traffic by maintaining control of all outbound routes and does not allow out pulsing of numbers not owned by our customers.

We certify that we commit to respond to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls, and that none of the voice traffic that originates on its network is authenticated with STIR/SHAKEN, and that all of the voice traffic that originates on its network is subject to a robocall mitigation program.

Thank you.
