

TelecommsPlus Inc is a small independent company in the tourist island of Barbados (166 square miles), which for the past 22 years has been a reseller of low-cost minutes from the IDT Corporation of the United States, primarily using Voip to cut the cost of international communication here.

We are selective about who our customers are and have been serving primarily small and large businesses (hotels, car dealerships, law offices, travel agencies etc) that wish to save money.

During that time we have never had a robo-call-type complaint of any kind.

While we have no control of the IDT network, they have already taken steps to fully comply with Stir Not Shaken. In addition, with our digital dashboard we also have the ability to immediately shut down and report any account that is ever found to be in breach of FCC standards.

In any event, since all our minutes are routed through IDT and they are SNS-registered we feel we are in good shape to comply with the FCC ideal.
