

FRN 0028883825

RouteTrust is an end user. In addition to responding to requests made of RouteTrust by carriers, monitoring agencies or others in a timely manner, RouteTrust has created a tool for scoring every call received based on a proprietary algorithm (shaken/stir certificate, attestation value, caller frequency/behavior, dialing pattern, answer rate and duration of calls made, and more). This proprietary tool allows RouteTrust to block unwanted traffic based on the subjective sensitivity of any one number. As part of our scoring process, we maintain access to 'do not originate' files provided by third parties. We also maintain internal whitelists/blacklists for both phone numbers and IP addresses.

RouteTrust does not generate calls.
