

Origen Robocall Mitigation Plan

Our Company engages in responsible selling, in a B2B model.

We only work with registered businesses in Canada and US. All of our customers, have to provide a business name/number, address and one (or several) contact persons. Our porting departments have processes in place to ensure proofs of DID's ownership.

Restrictions, limitations and monitoring

All of our customers are notified that all and any kind of automatic dialers are disallowed, while using our services. Each account and individual user are limited to a pre-defined number of channels.

We have processes in place to quickly identify and review peaks in customer channel utilization.

Traceback

We will actively participate in the traceback requests from authorities and will do our best to cooperate in the identification of Robocall traffic.
