

Robocall Mitigation Plan

Know Your Customer

For each customer, WyoNet Inc. determines the nature of the business of each WyoNet Inc. customer, to ensure that WyoNet Inc. is not providing service to those engaged in robocalling. All customers are only able to place calls originating from their own phone number. Caller ID and call records are reviewed and verified when service is installed to verify legitimate caller ID information. We do not have any process to auto-generate calls and all calls are generated by human interaction only. Our firewalls permit traffic only from their verified and approved IP addresses.

Traceback

WyoNet Inc. responds to all traceback requests from the Commission, law enforcement, and the registered traceback consortium and cooperates with such entities in investigating and stopping any illegal robocalls that attempt to use the systems of WyoNet, Inc.

Robocall Mitigation Program

WyoNet will use the services of Inteliquent / Sinch to monitor and track outbound voice traffic to prevent the origination of illegal robocalls and comply with the requests of any traceback requests from the commission, law enforcement and the industry traceback consortium.
