

Invenient Veritatem

Per FCC FRN: 0031485931

We are a phone system platform and provide inter-office services to professional services businesses such as:

- Surgery centers
- Medical offices / Dental etc..
- Legal, accounting, engineering firms
- And others.

We do NOT provide services at all to outgoing call centers.

We use Telco services from bandwidth.com among others to provide access to our clients for external, local / long distance and occasionally international calling.

We do NOT provide the ability with our services and connected Telco for a large amount of calls to happen at the same time, as needed by Robocallers. We limit the number to 5 maximum per second.

As a part of our agreement with the client, the client must certify that they shall not use our platform in ways "alleged to violate any criminal or civil law". And **Loquantur** maintains the contractual ability to suspend services immediately if "Client fails to comply with any applicable laws and regulations... or if requested to do so by a governmental entity".
