

Robocall Mitigation Program Description

Company Name:	S-Mobile LLC
FRN:	0031439995
Grantee Code / RMD:	RMD0008746
Date:	08/29/2025

S-Mobile LLC provides voice services exclusively for inbound calls via Direct Inward Dialing (DID) numbers. Our platform does not originate any outbound calls to the public switched telephone network (PSTN). As such, S-Mobile LLC does not meet the FCC definition of a voice service provider that originates calls, and is therefore exempt from STIR/SHAKEN implementation. Nevertheless, S-Mobile LLC maintains compliance with 47 CFR § 64.6305(d)(ii)-(iii) by ensuring that: 1. No outbound robocalls are originated by our network. 2. Inbound traffic is continuously monitored for abnormal patterns that may indicate fraudulent or spoofed activity. 3. Access to our services is restricted to verified and legitimate customers through strict onboarding and authentication procedures. 4. Security measures are in place to prevent unauthorized use of our DID resources. 5. We cooperate with law enforcement and industry traceback initiatives in the event that suspicious activity is detected. Through these measures, S-Mobile LLC affirms that it does not contribute to unlawful robocall traffic and remains committed to supporting the FCC's goals of reducing unwanted and illegal robocalls.
