Subject: Updated Robocall Mitigation Regulations Certification

Dear Sir/Madam,

We are writing to confirm that Bravo Price Corp complies fully with the requirements set forth by the FCC in relation to the Robocall Mitigation Database. Our organization does not engage in the initiation or facilitation of illegal robocalls or any robocalls, and we actively adhere to all applicable regulations to ensure the integrity of telecommunication services.

Our company does not utilize automated systems for robocalls and has implemented measures to prevent any unauthorized or unlawful use of our network. Additionally, we have a robust framework in place to identify and address any potential risks associated with robocall traffic. The level of our service provided to clients does not allow them to spoof ANI numbers and make more than 1 simultaneous call. In addition, we have implemented Blocklists and Call Data Analysis.

We kindly request that our listing in the Robocall Mitigation Database remain active, as removal could cause unintended disruptions to our legitimate business operations. Should you require additional information or documentation to verify our compliance, we would be pleased to provide it promptly.

Robocall Mitigation Plan

1. Overview of Operations

Bravo Price Corp. is a voice service provider - calling card service provider. We do not originate or facilitate robocalls in any capacity. Our primary operations involve providing services such as selling telephone cards.

2. Statement of Non-Participation in Robocalls

We confirm that:

- Our company does not originate, transmit, or facilitate any form of automated or robocall traffic.
- We do not use auto dialers or pre-recorded messaging systems for outbound calling.

3. Measures to Prevent Robocalls

Although we do not make robocalls, we implement the following measures to ensure compliance with the FCC's regulations and to prevent the transmission of illegal robocalls through our systems:

- Traffic Monitoring:
- Regularly monitor and analyze network traffic for abnormal patterns that could indicate robocall activity.
- Call Authentication
- Customer Screening
- Developed sophisticated proprietary software that enables us to detect if a customer even attempts to make robocalls.

Cooperation with Authorities:

Promptly respond to any requests or inquiries from the FCC or law enforcement related to robocall investigations.

4. Commitment to Robocall Mitigation

Bravo Price Corp. is committed to maintaining a robocall-free network and complying with FCC regulations. We actively monitor our systems and take swift action to prevent the origination or transmission of any robocalls.

Thank you for your attention to this matter. Please feel free to contact us directly at info@abinet.com or 212-695-0555 if further clarification is needed.

Sincerely,
Gregory Davidzon
Vice President
