

LANspeed Technologies LLC Robocall Mitigation Strategy

We are a small VoIP provider and know each of our customers personally, but still we have implemented mitigation strategies to avoid facilitating robocalls, we leverage VOIP providers which has their own mitigation strategies across all carriers utilized.

The following is a high-level view of some of our current mitigation strategies:

- • Placed limits and set alerts for outbound usage and concurrent SIP channels.
- • Blacklisted IP blocks from regions known to engage in robocalling.
- • Regularly blacklist any IP address that attempts fraudulent SIP authentications.
- • Review monthly outbound spending comparisons for existing customers.
- • Update phone and server software in a timely manner to eliminate security vulnerabilities.
- • Onboard only local and trusted customers, zero customers are located outside the continental US.
- • Implemented comprehensive CDR analysis and visualization tools used Monthly.
- Respond to any and all request from the Traceback Consortium, CALEA and all Law Enforcement Agencies.
