

To Whom It May Concern:

We, RPM Computers, certify that we commit to respond to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls, and that some of the voice traffic that originates on its network is authenticated with STIR/SHAKEN, and the remainder of the voice traffic that originates on our network is subject to a robocall mitigation program.

We are a small Hosted VoIP provider, and we have full control what numbers originate or terminate our platform, our mitigation program includes only allowing to set caller ID's that are assigned to the customer, we do not attest our own certificates but our upstream providers (Example: Bandwidth) attest our calls for us, we will be implementing a solution with Clearip to sign and attest our own calls with out own certificate in the future.

Sincerely,

Marco Camparsi
President
RPM Computers
