

Robocall Mitigation Plan

Brevium Corporation (RMD0011131)

I. Company Overview

Brevium Corporation (“Brevium”) is a U.S.-based technology company that enables healthcare providers to coordinate patient care through automated notifications, including automated voice notifications. These communications are strictly limited to healthcare-related purposes, such as:

- Appointment reminders
- Due for care reminders
- Clinic closure notifications

Brevium utilizes Inteliquent, Inc. (“Inteliquent”) to provide its customer with the above capabilities. Brevium does not control the softswitch, number porting or call trunking for the associated calls. Accordingly, Brevium does not have the facilities necessary to implement STIR/SHAKEN. Brevium has, however, adopted this robocall mitigation plan to establish procedures intended to limit the potential for the origination, carrying, or processing of unlawful robocalls from its voice services.

II. Know Your Customer

Brevium follows the best practices for vetting caller identity recommended by the North American Numbering Council (NANC) Call Authentication Trust Anchor Working Group. This process includes confirming the identity of Brevium customers – (i) contact person(s); (ii) business location; (iii) state or country of incorporation; (iv) federal tax identification; and (v) the nature of our customers’ businesses.

III. Robocall Mitigation Practices

Brevium’s underlying voice provider, Inteliquent, has committed to fully complying with the Commission’s roboblocking requirements. In addition, Brevium maintains the following robocall mitigation measures:

Content Limitation

- All calls are limited to healthcare coordination.
- No marketing, solicitation, or promotional content is ever transmitted.

Vendor Controls

- Calls are transmitted exclusively through Inteliquent, Inc.
- Inteliquent applies STIR/SHAKEN call authentication and DNC checks prior to call completion.

Internal Safeguards

- Brevium maintains strict customer onboarding and usage controls. Only established medical practices may use our platform.
- Each client's patient contact list is provided solely for communications relating to their own patients' care.

Monitoring & Complaint Response

- Brevium maintains a process for monitoring call traffic patterns and volumes to detect anomalies.
- Brevium provides a means to remove patients from further contact who opt out.
- Complaints come through our medical practice customers, and any reported issues are promptly investigated, and remedial action is taken where appropriate.

IV. Compliance Commitment

Brevium is committed to full compliance with FCC regulations regarding illegal robocalls. We will:

- Ensure ongoing use of a carrier that fully supports STIR/SHAKEN protocols.
- Review and update this Robocall Mitigation Plan as FCC requirements evolve.
- Cooperate with FCC requests, investigations, or inquiries related to our calling practices.

V. Contact Information

Primary Compliance Contact:

Scott Chambers
Chief Financial Officer and Compliance Officer

Brevium Corporation
947 S 500 E; Ste 250
American Fork, UT 84003
Tel: 801-854-5416
Email: schambers@brevium.com

VI. Traceback Requests

Brevium commits to fully respond, within 24 hours, to all traceback requests from the Federal Communications Commission, law enforcement, state attorneys general, Inteliquent, and the Registered Traceback Consortium. Brevium will cooperate with such entities to investigate and stop any illegal robocallers that use Brevium's service to originate calls.

VII. Call Analytics Systems

Brevium relies upon Inteliquent's call analytics systems to identify unlawful traffic originated by its customers.

VIII. Plan Updates

Brevium will continue to monitor industry best practices and improve our internal processes to ensure our systems adapt to address the ongoing challenges affecting this industry.

Certification

Brevium certifies that it has implemented the robocall mitigation practices described herein and that it does not originate or transmit unlawful robocalls. Brevium further certifies that its traffic is limited to authenticated, healthcare-related communications on behalf of licensed medical providers, and that robust mitigation measures are in place to prevent unlawful calls.
