

June 7, 2022

To whom it may concern:

Legacy Security Services is a private wholesale monitoring central station. We operate a facility that operates 24/7 hours a day 365 days of the year. As a wholesale monitoring company, we provide private dispatch services for police, fire and medical alarms throughout the US for close to 200,000 consumers throughout the US on behalf of close to 900 private alarm companies. Since our business is of the emergency nature, we do not call consumers and end users to sell them products or services.

If you require additional information, please feel free to contact myself at anytime.
