RE: Robocall Mitigation via STIR/SHAKEN

This letter is to certify that DemandHub Inc. will respond to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use DemandHub's service to originate calls.

At the moment, DemandHub does not originate any voice traffic on its network. For this reason, DemandHub does not authenticate any voice traffic that originates on its network using STIR/SHAKEN. DemandHub's network is currently only used as a voice traffic destination, and we have disabled all voice traffic from originating from our network to prevent robocalls.

If DemandHub begins to originate voice traffic from its network, it will commit to a full STIR/SHAKEN implementation for the purposes of robocall mitigation purposes.

DemandHub has not received any extensions under 47 CFR § 64.6304.

Sincerely,

A handwritten signature in black ink, appearing to read 'A. Malik'.

Shahzad Malik, Ph.D.
Chief Technology Officer
DemandHub Inc.
