

Robocall Mitigation Program Description

Company Name: OZtechs LLC

Address: 101 Sanders Ranch rd, Moraga, CA 94556

Contact Information: Ofer.Zur@oztechs.com 9257652999

1. Robocall Mitigation Practices

We implement the following practices to mitigate robocalls:

- Adherence to the STIR/SHAKEN framework for authenticating caller ID information.
- Routing all voice traffic through a single IP address to enhance traffic monitoring and management.
- Proactive identification and mitigation of suspicious call patterns using advanced analytics.

2. Monitoring and Enforcement

We continuously monitor our network traffic to detect and prevent illegal robocalls. Non-compliant traffic is flagged and reported, with appropriate actions such as traffic blocking or escalation to relevant authorities.

3. Certification and Reporting

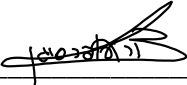

We maintain compliance with FCC rules by certifying adherence to robocall mitigation requirements and filing regular updates with the FCC.

4. Contact Information for Escalation
