

Robocall Mitigation Plan Statement

We are a VoIP service provider that delivers outbound calls exclusively through Voxbone (now Bandwidth), which is an FCC-registered, STIR/SHAKEN-compliant carrier. All outbound calls are authenticated and signed with full Attestation A by our upstream provider.

We do not originate traffic from third parties and do not allow unauthorized usage of our network. We monitor our call traffic patterns and respond promptly to any customer complaints or traceback requests.

Our company is registered with the FCC (FRN: 0032752768).

If needed, we are available for traceback inquiries via [support email] support@clicktel.com or [business phone] 954-923-9511.
