Subject: STIR/SHAKEN is not implemented in our Network and method to combat Robocalls.

Dear FCC,

Our current equipment does not support STIR/SHAKEN but we are in the process of working to support it. This may take some time. We certify that a fraud department closely monitors the traffic from our end users, additionally we do not allow our end users to change the callerID. All traffic originated from our network is traceable:

We are committed to:

- Respond to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls, and that none of the voice traffic that originates on its network is authenticated with STIR/SHAKEN, and that all of the voice traffic that originates on its network is subject to a robocall mitigation program.

Thanks
