

FCC Robocall Mitigation Filing – Declaration

1. Provider Type

Voice Service Provider (Originating Provider)

2. STIR/SHAKEN Implementation

Partial Implementation

3. Rule Exemption Statement

The filer does not claim an exemption. STIR/SHAKEN is partially implemented where technically feasible. For traffic not authenticated via STIR/SHAKEN, a robocall mitigation program is in place as described below.

4. Robocall Mitigation Program Description

Neway Technologies has partially implemented the STIR/SHAKEN framework on SIP-based calls using our SBC infrastructure. Where full implementation is not technically feasible, we operate a robust robocall mitigation program that includes:

- Verifying all customers before service activation (Know Your Customer - KYC)
- Limiting outbound and inbound call volumes per customer
- Blocking or flagging calls from numbers not explicitly assigned to the customer
- Monitoring traffic patterns to identify and stop suspicious activity
- Responding to traceback requests within 24 hours

These measures are continuously reviewed and updated to comply with FCC rules and best practices.

5. Company and Contact Information

Company Name: Neway Technologies

Business Address: Rapport 3, Kfar Saba, Israel

FRN: 0033335373

Point of Contact:

Name: Golan Edri

Title: VP UC

Email: golan.edri@abra-it.com

Phone: +972-52-689-7078

1. Statement of Foreign Status

Abra IT is a telecommunications provider headquartered in Israel. As a foreign-based provider, it does not operate under U.S. jurisdiction. Nevertheless, Abra IT acknowledges the importance of mitigating unlawful robocalls to the United States and affirms its commitment to comply with the FCC's Robocall Mitigation Database (RMD) requirements applicable to foreign voice service providers.

2. Robocall Mitigation Measures

Abra IT has implemented robust internal policies and technical safeguards to prevent the origination or transit of unlawful robocall traffic to the United States, including:

- Verifying and maintaining strict control over enterprise-originated voice traffic.
- Prohibiting the use of autodialing systems or caller ID spoofing techniques.
- Continuous monitoring and analysis of traffic for anomalies and abuse.
- Manual intervention and blocking of any suspicious or abusive call patterns.
- Periodic audits and enforcement of compliance procedures.

3. Cooperation with U.S. Authorities

Abra IT pledges to fully cooperate with traceback requests from the FCC, USTelecom, and any other authorized enforcement agency. All such requests will be handled with urgency and transparency.

4. Designated Contact for Compliance and Traceback
