

FCC Robocall Mitigation Certification Statement

Company Name: CalFusion Networks LLC

FCC Registration Number (FRN): 0033408618

Compliance Contact:

- Name: Steven Calton
- Title: Director of Operations
- Email: scalton@calfusion.net
- Phone: (817) 881-4867
- Business Address: PO BOX 3218, Grapevine, TX 76099

STIR/SHAKEN Implementation

CalFusion Networks has fully implemented the STIR/SHAKEN framework across all IP-based portions of its voice network. We use Voip Innovations, who signs outbound calls using Secure Telephone Identity (STI) certificates issued by an approved Certification Authority. This ensures caller ID authentication and protects against spoofing.

Robocall Mitigation for Non-IP Traffic

For legacy systems not capable of STIR/SHAKEN, CalFusion Networks uses the following mitigation techniques:

- Real-time call analytics to detect and block suspicious traffic
- Blacklist screening of known fraudulent numbers and invalid formats
- CAPTCHA-style IVR challenges for flagged calls
- Manual review and escalation of anomalous call patterns

Traceback Cooperation

CalFusion Networks cooperates fully with the FCC, law enforcement, and the Industry Traceback Group (ITG). The company responds to traceback requests within 24 hours and maintains detailed call records to support investigations.

Customer Vetting

All customers are vetted prior to activation. This includes:

- Verification of legal identity (e.g., EIN, incorporation documents)
- Proof of number ownership (CSR or recent bill)
- Enhanced scrutiny for international customers using NANP numbers

Certification Statement

CalFusion Networks certifies that it has implemented effective measures to prevent the origination of illegal robocalls and complies with all FCC requirements under 47 CFR § 64.6305. This includes full STIR/SHAKEN deployment where applicable and robust mitigation practices elsewhere.
