

To whom it may concern,

I am writing to confirm that SecureCo fully complies with the FCC Robocall database and mitigation requirements. This is due to our exclusive use of Bandwidth as our voice services provider in the United States. Bandwidth utilizes STIR/SHAKEN compliance to prevent and mitigate illegal robocalls.

As a result, our customers can be assured that they will not receive unwanted and illegal robocalls. We take our commitment to customer privacy and protection very seriously and are proud to partner with Bandwidth in achieving this goal.

Thank you for your trust in SecureCo.

Sincerely,

Joshua McAdam,  
Chief Operating Officer
