

Robocall mitigation plan

for Hubiquity Inc (FCC reg #0033810565)

Hubiquity Inc has extremely limited use of voice calls that places it a zero risk of exposing anyone to a robocall.

Hubiquity Inc never originates any voice calls nor gives anybody the ability to originate voice calls through their services.

The only voice feature that Hubiquity Inc provides is for incoming voice. When one of the Hubiquity Inc managed US phone numbers receives a phone call, Hubiquity Inc forwards that incoming phone call to a **predefined and controlled** phone number that belongs to one of Hubiquity Inc's customers. That call forwarding is implemented via Bandwidth (Hubiquity Inc's voice services provider) and fully stir/shaken compliant.
