

ROBOCALL MITIGATION PLAN

- 1) We are collecting US traffic from Italian mobile operators mainly from roaming customers. We do not do hubbing nor trading from call centers aggregators or similar;
- 2) Our network is compliant and transparent to the STIR/SHAKEN so we can respond to any request coming from the Industry Traceback Group **within 24 hours**;
- 3) Our platform allows any blocks on calling or called numbers/customers. Traffic monitoring is set to avoid irregular behavior based on the normal retail traffic.
