Communication Voip Platform

Communication Voip operates a unique platform that allows existing origination traffic to be delivered to call centers buying these consumer generated calls. All calls terminated into Communication Voip platform were originated from the subscriber or consumer and terminated to Communication Voip directly where consumer decides which product(s) they desire, and ultimately terminated to the proper call center. Communication Voip does not work with or allow any customer to generate outbound calls thru its platform.

Robo Call Mitigation Efforts

Communication Voip monitors quantity and frequency of calls coming into its platform, and takes great efforts to stop and submit these calls to both FCC and Somos. All of Communication Voip calls are consumer to Business generated. At no time are calls being manufactured from the Communication Voip platform to consumers or businesses. Communication Voip will work with any authorities in an effort to avoid and stop any suspect calls, or requests with investigating and stopping illegal robocalls. Communication Voip knows its customers and pre-screens any client before entering into contract.

Compliance with Government Agencies

Communication Voip is committed to respond to any and all requests from the Industry Traceback Consortium and all law enforcement agencies who officially and properly subpoena customer records. Communication Voip keeps CDRs for a period of 5 years.
