STIR/SHAKEN Compliance

i360, LLC (“i360”) does not believe that it constitutes a “voice service provider,” “gateway provider,” or “intermediate provider” for purposes of 47 C.F.R. § 64.6305. Nevertheless, in an abundance of caution, it makes this filing with the FCC.

Robocall Mitigation Plan

i360 has implemented the following practices to mitigate unauthorized robocall traffic:

- i360’s customers are contractually obligated to conform to all applicable laws and regulations in connection with their use of i360’s platform. Customers who breach this obligation are subject to termination of i360’s services.
- Call traffic and events are monitored and logged to identify suspicious traffic patterns and traffic load.
- Subject to applicable law, i360 will respond fully and in a timely manner to all traceback requests from the FCC, law enforcement, and the industry traceback consortium and will cooperate with such entities in investigating and stopping any illegal robocallers using i360’s service to originate calls.

i360 is committed to ensuring compliance with all applicable regulations regarding the use of telephone networks, including with respect to robocalls. i360 believes that the foregoing robocall mitigation plan is consistent with the requirements of the regulations.
