Re: Robo Call Mitigation Attestation

Dear Madam/Sir,

Please accept this attestation as our explanation of process in place to prevent robo call originations from our network.

We don't offer services to the general public, and as such our enterprise does not confront mass dialers in our normal operation.

We certify that we have not implemented STIR/SHAKEN authentication on any portion of our network.

We certify that all voice traffic that we carry is subject to a robocall mitigation program.

Further, we certify that the attached PDF carries our process for preventing the carrying/processing of robo call traffic.

Thank You,

William Sanchez
President
Advanced Satellite Systems, Inc.

Robo Call Mitigation Steps

Step 1. Our calls originate in house, and as such extensions are provided to secured devices.

Step 2. We audit our voice traffic by checking our call detail reports

Step 3. We use our deposits with our voice termination providers as a stop gap, only paying a fixed amount. Reason being, that if we had an issue with call fraud, including robo calling it would be discovered quickly by virtue of all calls being blocked because of a lack of funds in our account.

Advanced Satellite Systems, Inc. comits to abiding by the FCC's request to respond fully and within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to carry or process calls.

Thank you,

William Sanchez
