In part of our continued effort to avoid originating illegal robocall traffic as part of our robocall mitigation program, Celerity adheres to the following steps:

- Vet all potential clients/accounts to learn the nature of their business and their calling practices
- Take part in setting up each account so we know what kinds of applications are being used
- Use an internal Quality Control team to continually monitor calls and traffic originating on our platform for compliance

Please contact us if you have any further questions regarding these steps.
