RE: Robocall Mitigation Program

Dear Sir(s)/Madam,

This is to serve as our Robocall Mitigation Program document. We are not in the Telco business but we do take advantage of hosting our own VOIP servers which connect to external inbound and outbound trunks.

The phone connections and service are for our own sole use for manual calls of our employees. We do not use any automated or unmonitored calling systems.

We also make efforts to keep our servers and systems secure to reduce external threats.

Feel free to reach out to me if you require further information.

Sincerely,

A handwritten signature in black ink, appearing to read "D.L. McLean", written in a cursive style.

David L. McLean
President
McLean Technology Group, Inc.
