

EXHIBIT TO CERTIFICATION OF AFNET LLC FOR ROBOCALL MITIGATION DATABASE

Indicated are the robocall mitigation employed by Afnet LLC. Afnet LLC is a reseller of wireless telephony and broadband services and certifies that all measures and policies implemented by the underlying carrier of T-Mobile USA Inc. are applied to Afnet LLC customers. Afnet LLC will continue to implement new robocall mitigation software measures as they become available from the underlying carrier.

Traceback Requests

Afnet certifies that the software from the underlying carriers follows required traceback standards. Afnet commits to respond fully and within 24 hours to all traceback requests from the commission, law enforcement, regulators, and the industry traceback consortium.

STIR/SHAKEN Implementation

Afnet's underlying carriers have implemented STIR/SHAKEN to all egress traffic. STIR and SHAKEN is an industry framework that is being developed to prevent the completion of calls where the originating provider does not own or is not authorized to use the Caller ID associated with the call. STIR/SHAKEN uses digital certificates, based on common public key cryptography techniques, to ensure the calling number of a telephone call is secure. The expectation is that the certificate technology will enable the called party to verify that the accurate number is accurate and that it has not been illegally spoofed.
