To Whom it May Concern,

Our phone service operates on Bandwidth's network, leveraging their STIR/SHAKEN implementation, as outlined in their FCC filing titled "Partial STIR/SHAKEN Implementation - Performing Robocall Mitigation." Consequently, our STIR/SHAKEN setup mirrors theirs.

Furthermore, our usage of Bandwidth's service is strictly limited to facilitating outgoing calls for our customers through phone numbers (DIDs) that we directly manage and bill them for. In other words, we do not configure any of our customer's phone system to make outgoing calls using phone numbers whose ownership we are not aware of.

It is important to note that our clients primarily comprises local small business and some municipal government entities. Their phone usage is predominantly oriented towards communication with their respective customers and clients, rather than engaging in any form of telemarketing.

Respectfully

Marcelo Blatt
