

EXHIBIT TO CERTIFICATION OF AMERIMEX SOLUTIONS FOR ROBOCALL MITIGATION DATABASE

To Whom It May Concern:

Indicated below are the robocall mitigation measures employed by AmeriMex Solutions, Inc. AmeriMex Solutions is prepaid calling card provider, and AmeriMex Solutions's preceding provider is Inteliquent, which has network elements in place to filter the incoming and outgoing calls to mitigate robocalls. AmeriMex Solutions will continue to implement new robocall mitigation measures as they become available.

Traceback Requests.

Company certifies that its software follows required traceback standards. Company commits to respond fully and within 24 hours to all traceback requests from the Commission, law enforcement, regulators, and the industry traceback consortium. Company's underlying provider adheres to FCC traceback and mitigation protocols.

Our point of contact to handle all traceback requests is:

Alejandro Caipa Alejandro@amerimex.com

President

678-832-6220

Know your Customer

As a prepaid calling card provider, we do not require IDs or similar documentation to register users. We do request names during registration, and we do conduct extensive fraud and traffic monitoring. We have developed several tools that allow our system to detect and block fraudulent activity.

Know Your Underlying Provider

Company relies on service agreements that allow it to resell service of its underlying providers, Inteliquent, IDT, Telvantis, BTS, and C3ntro. These upstream providers have committed in their own robocall mitigation plans to work diligently to mitigate all illegal robocalls, including cooperating fully when receiving traceback requests.

Call Analytics

As a reseller, Company must rely on its upstream provider and/or their third-party vendors to determine if originating calls should be blocked based on call analytics practices. Inteliquent describes its use of call analytics in its robocall mitigation plan.

STIR/SHAKEN Implementation.

AmeriMex Solutions receives only authenticated caller identification from its upstream providers. AmeriMex Solutions implements STIR/SHAKEN on its PBX network and signs and certifies all calls on its network. Further, AmeriMex Solutions passes all authenticated Caller Identification information unaltered. AmeriMex's vendors all comply with STIR/SHAKEN, as applicable. Amerimex Solutions signs call using a solution called "ClearIP" from TransNexus. Our OCN is 947K.
