

Ellianz Technology is doing the following items to Mitigate Illegal RoboCalls

1. Subscribe to various real time lists of identified scam anis that are being used and adds them to our block lists on our switch.
2. No longer allows any generic email addresses such is gmail, proton mail, etc for wholesale and business customers.
3. Verifies Address and business locations for all new customers to our system.
4. Permanently disable any end user accounts that get 2 or more tracebacks.
5. Immediately respond to any tracebacks that we receive and report to upstream vendors.

Ellianz Technology future

1. In the process of building our own switching platform so that we can implement stir and shaken on all our customers.
2. Implement better KYC during customer registration requiring photo documentation of utility bill and photo ID of customer.
3. Ability to provide call blocking on customer and carrier accounts.
4. Will require all our wholesale customers to implement stir and shaken or be registered in the robocall medication database.
