

Robocall Mitigation and Certification Program

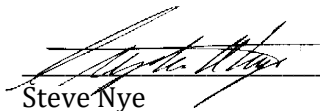

Date: March 7, 2024

Robocall mitigation technique: Voice services provided by mobile messaging solutions (mms) are **inbound-only**. No outbound dialing/calling is enabled.

Enforcement Commitment: mms is committed to respond within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium and to cooperate with such entities in investigating and stopping any illegal robocallers.

Certification (STIR/SHAKEN): mms has not implemented the STIR/SHAKEN authentication framework on any portion of its network, as no outbound calls originate from the mms voice network/platform (as per mms's Robocall Mitigation Program).
