

ASF TELECOM LLC Robocall Mitigation Plan

Introduction and Purpose ASF TELECOM LLC is committed to implementing robust measures to mitigate illegal robocalls across its network, adhering to the Telecommunications Robocall Abuse Criminal Enforcement and Deterrence (TRACED) Act and the STIR/SHAKEN standards. This plan outlines our strategies and commitments to combatting illegal robocalls and ensuring compliance with regulatory requirements.

Company Overview ASF TELECOM LLC provides a range of telecommunications services, specializing in voice transmission. As an integral player in the telecom industry, we are dedicated to delivering reliable services while maintaining the highest standards of legal and ethical compliance.

Compliance with TRACED Act and STIR/SHAKEN ASF TELECOM LLC complies with the TRACED Act, actively participating in industry efforts to trace back and identify the source of illegal robocalls. Although we are a small provider and may qualify for certain exemptions, we strive to implement the STIR/SHAKEN protocols to authenticate and verify caller ID information, ensuring the integrity of our call traffic.

Fraud Prevention and Mitigation Strategies Our fraud prevention strategy includes blocking known fraudulent calls, conducting regular analyses to detect abnormal calling patterns, and implementing our in-house Intelligent Fraud Management System (IFMS) to monitor and analyze call traffic for potential fraud.

Traceback and Cooperation We are committed to responding to all traceback requests within 24 hours and cooperating with law enforcement, regulatory bodies, and the industry traceback consortium. Our goal is to identify and stop illegal robocall traffic originating or transiting through our network.

Network Monitoring and Call Analytics ASF TELECOM LLC employs advanced network monitoring and call analytics to detect and prevent illegal robocalls. We analyze call patterns, volume, and other indicators to quickly identify and address potential illegal activity on our network.

Customer and Upstream Provider Vetting We thoroughly vet our customers and upstream providers to prevent illegal robocall traffic. This includes verifying the legitimacy of new and renewing customers and monitoring our upstream providers to ensure they adhere to robocall mitigation practices.

Certification and Regulatory Compliance ASF TELECOM LLC maintains active certification in the Robocall Mitigation Database and adheres to all FCC regulations. We regularly update our policies and procedures to reflect the latest regulatory requirements and industry best practices.

Conclusion and Contact Information ASF TELECOM LLC is dedicated to leading the fight against illegal robocalls and ensuring the security and reliability of our telecommunications services. For more information or to report suspected illegal robocall activity, please contact our Robocall Mitigation Program Manager at argelio@asftelecom.com
