

FCC Robocall Mitigation Program for 33 Wireless Inc:

1. Implement Call Authentication: 33 Wireless Inc will implement call authentication protocols such as STIR/SHAKEN to verify the authenticity of incoming calls and prevent spoofing.
2. Call Blocking: Utilize call blocking technology to automatically block known robocall numbers and suspicious calls identified by analytics.
3. Customer Education: Educate customers on how to recognize and report robocalls, as well as provide tips on how to avoid falling victim to scam calls.
4. Compliance with FCC Regulations: Ensure that all robocall practices are in compliance with FCC regulations, including the Telephone Consumer Protection Act (TCPA) and Truth in Caller ID Act.
5. Monitoring and Reporting: Regularly monitor call traffic for any suspicious activity and report any violations to the FCC.
6. Collaboration with Industry Partners: Work with industry partners, such as other wireless carriers and technology providers, to share information and best practices for combating robocalls.
7. Continuous Improvement: Regularly review and update the robocall mitigation program to adapt to new threats and technologies.

By following these steps, 33 Wireless Inc will do its best efforts to effectively mitigate the impact of robocalls on their customers and maintain compliance with FCC regulations.
