

Robocall Mitigation Plan

Sabrhub does not require a Robocall Mitigation program as it leverages Bandwidth for voice services, ensuring complete STIR/SHAKEN compliance. Sabrhub's voice business revolves around providing messaging and VoIP services utilizing Bandwidth's services, which inherently benefit from Bandwidth's STIR/SHAKEN program. Moreover, Sabrhub currently does not have any voice services of its own and does not intend to pursue such services in the future.
