ROBOCALL MITIGATION PROGRAM

8406065 Canada Inc/MC Telecoms provides voice services exclusively to 300 residential and business subscribers thus is eligible for the STIR/SHAKEN implementation extension under 47 CFR S 64.6304.

8406065 Canada Inc/MC Telecoms uses SIP termination/origination services provided by IDT and Voxtel carrier services that are fully compliant with required FCC guidelines including STIR/SHAKEN call attestation. Security provisions are implemented to avoid fraudulent calls and minimize the risk of unauthorized Robocalls through our switch.

These provisions include, but are not limited to the following:

1. Call screening monitoring on our switch.
2. CNAM services to detect fraudulent calls.
3. Anti hacking feature enable from our termination/originating service provider.
4. Destination restrictions to end users who violate our fair usage policy.
5. 8406065 Canada Inc/MC Telecoms limits the daily and monthly dollar amounts of calls placed per customer account based with the limits set based on the type of customer.

On top before sending calls to our providers mentioned above, we are tunneling all the traffic through our own monitoring server and terminating any abnormal activity such as high-rate call directions, international call attempts, any suspicious calls or unknown (not out customer) caller-id's.

8406065 Canada Inc/MC Telecoms commits to respond to all traceback requests from the Commission, law enforcement and certifies to help in cooperation with such entities in investigating and stopping any illegal Robocalls that may use our services to originate or terminate calls.

Olutola Agbelese
Chief Operating Officer
