

Robocall Mitigation Plan

May 20th, 2024

In compliance with 47 CFR § 64.6305a paragraph (a)(1) and paragraph (a)(2) we at Wi-Fiber, Inc. (a voice service provider) declare that:

We have implemented, through our PSTN provider (Twilio), the use of STIR/SHAKEN measures as reasonable steps to avoid originating illegal robocalls. Our standard procedures dictate that all additional phone numbers brought into the system will be added to the STIR/SHAKEN Profile as well.

We are also committed to respond within 24 hours to all traceback requests from The Commission, law enforcement, and the Industry Traceback Consortium. We will also cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls.
