

New Phone is a telecommunications provider offering voice, SMS, and fax services to US-based companies. New Phone also provides services allowing businesses to acquire new or transfer existing phone numbers for the purposes of conducting business with their customers.

During the onboarding process, businesses are educated on federal regulations associated with voice and SMS services and are required to sign an agreement confirming they understand the laws in place.

New Phone will refuse services to business entities that do not comply with or repeatedly violate federal regulations.
