

To Whom It May Concern,

BARANT Technology group is a provider of cloud hosting and IT services specializing in custom workflow development for small to medium sized business. We also provide PBX hosting services and manage the hosted services ourselves. All of our customers are not phone centric businesses but utilize telephony to conduct their business correspondence and operations on an as needed basis. None of our customers robo-dial or perform sales over the phone en-mass.

We respond to all traceback requests from the commission, law enforcement and the registered traceback consortium and cooperate with such entities in investigating and stopping any illegal robocallers that use our service to originate calls.

Our robocall mitigation is based upon providing simple trunk services for customers that utilize our hosted pbx platform. We are a small company with very close relationships to our customers and we do not provide any automated dialing or robocall style services. Inbound call support services for account management exist but not outbound.

Sincerely,
Brad Arant Sr.
