3. Description of Robocall Mitigation Practices

A. Network Monitoring and Analysis

- **Traffic Analysis:** WavTeK implements real-time monitoring of call patterns to identify and flag suspicious activity indicative of robocalls.
- **Call Authentication:** WavTeK uses STIR/SHAKEN protocols to verify the legitimacy of incoming and outgoing calls.

B. Call Blocking and Filtering

- **Blacklist Database:** WavTeK maintains and update a blacklist of known robocall numbers and block these at the network level.
- **Call Filtering:** WavTeK uses Skyetels anti spam system to help detect and block potential robocalls for our customers.

C. Customer Protection Measures

- **Caller ID Verification:** WavTeK ensures that caller ID information is accurate and has not been tampered with.
- **Consumer Education:** WavTeK provides customers with information on identifying and reporting robocalls, and offer opt-in call blocking services.

D. Cooperation with Authorities

- **Reporting Mechanisms:** our policy is to log and report suspicious robocall activity to the FCC and other relevant authorities.
- **Law Enforcement Collaboration:** WavTeK will cooperate with law enforcement agencies in their investigations of illegal robocall operations.

4. Technical Solutions Implemented

A. STIR/SHAKEN Implementation

- **Implementation Status:** WavTeK relies on our upstream provider Skytel to fully implement STIR/SHAKEN and maintain compliance.
- **Caller ID Authentication:** All of our customers Caller ID setup is done by our tech in compliance with all laws and policies to ensure no abuse or misuse is allowed.

. Compliance and Accountability

A. Compliance with FCC Regulations

- **FCC Rules Adherence:** WavTeK works with our gateway provider and operations staff to ensure compliance with all FCC rules and regulations.

B. Accountability Measures

- **Internal Policies:** WavTeK's policies and end user contract prevent the use of our services for robocalling efforts. Any customer that is detected performing unsolicited calling activities or using robo calling systems will be warned to stop immediately or have their services terminated.
- **Employee Training:** WavTeK educates our employee's on the FCC laws and policies so they can prevent the misuse of the system and catch policy violations before they are activated on our network.

6. Continuous Improvement and Feedback

- **Monitoring and Feedback:** WavTeK fully cooperates with our gateway provider to resolve any issues or violations in rapid manner.
- **Customer Feedback:** WavTeK's staff is always looking for feedback and will address any issues our customers have. From blocking numbers to filing reports and working with law enforcement.

7. Conclusion

WavTeK primarily relies on Skytel's advance network and high reputation to deliver quality voip services and actively take all precautions to prevent unsolicited traffic and automated activities by our customers. In addition we work with our customers and vendors to provide filtering and policies to minimize the effects of robocalls and unsolicited traffic from outside sources.
