

Titan Computer Services Robocall Mitigation Program

64.6305(d)(2)(ii)

End users are restricted on devices that can initiate/handle calls and cannot register their own, requiring manual effort to initiate calls and will be unable to change their own Caller ID. Customer identifying information will be collected and a contract will be required acknowledging the prohibition of illegal calls. Upstream providers will be vetted for STIR/SHAKEN handling compliance and robocall mitigation. Outbound Caller IDs will be monitored to ensure no calls are made using spoofed IDs.

64.6305(d)(2)(iii)

I, Michael Dare Shurbet, speak on behalf of Titan Computer Services, LLC in committing to cooperating and responding to contacts from the Commission, law enforcement, and the industry traceback consortium within 24 hours.
