

Robocall Mitigation Program Descriptions

Voice Service Provider

Our robocall mitigation program is designed to prevent the origination of illegal robocall traffic. We have implemented robust call authentication and validation systems to verify the authenticity of incoming and outgoing calls. Our network is equipped with advanced analytics to detect and block suspicious call patterns indicative of robocall activity.

We are committed to transparency and cooperation. We will respond to all traceback requests within 24 hours and actively participate in industry-wide efforts to combat illegal robocalls. Our program includes regular training for employees to enhance their ability to identify and address potential threats.

Gateway Provider

Our robocall mitigation program focuses on preventing the transmission of illegal robocall traffic through our network. We employ state-of-the-art technology to filter and analyze call traffic, identifying and blocking suspicious patterns associated with robocalls. Our system is designed to be highly adaptable to evolving robocall tactics.

We understand the importance of rapid response and collaboration. We will respond to all traceback requests within 24 hours and actively cooperate with law enforcement and industry partners to investigate and mitigate illegal robocall threats. Our program includes ongoing monitoring and analysis of network traffic to identify potential vulnerabilities and improve our mitigation strategies.

Non-Gateway Intermediate Provider

Our robocall mitigation program is designed to prevent the carriage and processing of illegal robocall traffic within our network. We have implemented call validation procedures to assess the authenticity of call information. Our network infrastructure is equipped with advanced analytics to detect and block suspicious call patterns associated with robocall activity.

We prioritize transparency and cooperation. We will respond to all traceback requests within 24 hours and actively participate in industry-wide efforts to combat illegal robocalls. Our program includes regular audits of our network and systems to identify and address potential weaknesses in our robocall mitigation measures.
