

Quito, August 31, 2024

To whom it may concern,

I am a self employee non gateway intermediate provider.

In response to FCC requirements regarding Robocalls mitigation procedures, this is what is implemented in telephone calls with destination USA:

- 1.- Call Volume limit: blocking outgoing traffic when exceding a quota.
- 2.- Blacklisting and Whitelisting: allowing only authorized originating numbers.

Best regards,

María Isabel Proaño
