

TIS GLOBAL LTD, a UK-based telecom entity (Reg. No. 11628621) headquartered at 110 Bishopsgate, London, deploys advanced technologies and stringent protocols to safeguard its network and clients from fraudulent activities.

Proactive Fraud Detection & Mitigation:

Utilizing state-of-the-art, real-time traffic analysis, TIS GLOBAL LTD ensures the detection and pre-emptive blocking of fraudulent activities, including robocalls, thus protecting customer interests and securing revenue streams.

Secure Call Processing & CLI Compliance:

The company enforces rigorous Caller Line Identification (CLI) validation, restricting network access exclusively to verified CLIs. This ensures all traffic adheres to regulatory standards and remains fully traceable.

Certified CLI Enforcement:

TIS GLOBAL LTD's infrastructure, supported by its NOC department, automatically rejects any unverified CLIs, thereby preventing spoofed calls and significantly enhancing network security.

Continuous Monitoring & Immediate Anomaly Response:

Through 24/7 monitoring of Call Detail Records (CDRs), the company is equipped to detect and address network anomalies in real-time. A dedicated team is authorized to implement immediate countermeasures, such as blacklisting, to maintain network integrity.

Collaborative Security Framework:

In alignment with industry best practices, TIS GLOBAL LTD engages in strategic partnerships, facilitating the exchange of intelligence and strengthening collective defences against emerging threats.

These robust, tech-driven measures underscore TIS GLOBAL LTD's commitment to all the legal compliance and its role as a trusted provider in the telecommunications sector.
