

## About us :

TCG Telecom is a telecommunications solutions provider specializing in devising and implementing individually tailored solutions in Lithuania and abroad. In everything we do, we strive to offer businesses the solutions and services that fully fit our customers needs, helping to seek out new ideas for business growth and development.

TCG Telecom was founded in 2008. In 2016 TCG Telecom joined CSC Telecom UAB company group.

## Robocall Mitigation Plan:

1. We provide services exclusively to our end clients. We do not deal with International Transit.
2. We are committed to responding to all requests from the Commission, law enforcement agencies, telecom operators, to investigate and suppress any illegal robocalls if our network is used to make illegal calls.
3. We monitor all voice traffic originating from our network from our end Clients. "A" numbers cannot be modified since any substitution is blocked by our network.
4. We are planning to purchase real time monitoring software to prevent illegal robocalls.
5. If we determine that a caller has attempted to make illegal robocalls, we are blocking such traffic immediately.
