
ROBOCALL MITIGATION PROGRAM DESCRIPTION

27 September 2024

Allianz I Inc

FCC Registration Number (FRN): 0036001881

Filing Type: Non-Gateway Intermediate Provider

1. Overview of Company's Role

Allianz I Inc acts solely as a reseller of Direct Inward Dialing (DID) numbers sourced from DIDWW (didww.com), a service provider based in Ireland. We provide these DID numbers to customers for their own use. Our role is strictly limited to billing and technical support, and we do not route, process, or carry any voice call traffic on our own network. All call traffic, including origination and termination, is handled directly by DIDWW.

As a reseller, we do not manage telecommunications networks, nor do we directly handle any voice services or telecommunications traffic.

2. Robocall Mitigation Practices

Since Allianz I Inc does not process, carry, or originate voice traffic, we do not implement robocall mitigation practices such as STIR/SHAKEN directly. These responsibilities fall to DIDWW, which provides the technical infrastructure, manages call routing, and complies with applicable FCC regulations regarding robocall mitigation.

Our specific responsibilities in the relationship with our customers include:

Billing services: We handle the billing for the DID numbers used by our customers.

Customer support: We provide technical support to our customers but are not involved in the voice traffic itself.

3. Exemption from STIR/SHAKEN Implementation

Allianz I Inc does not have the technical capability to implement the STIR/SHAKEN caller ID authentication framework because we do not manage any part of the telecommunications network. Since all call traffic and voice services are directly handled by DIDWW, Allianz I Inc is exempt from implementing STIR/SHAKEN.

We rely on DIDWW to comply with the FCC's robocall mitigation requirements, and we have confirmed that they have implemented reasonable steps to avoid carrying or processing illegal robocalls in compliance with 47 CFR § 64.6305(c).

4. Commitment to Traceback Requests

Although Allianz I Inc does not handle call traffic, we are committed to cooperating fully with traceback requests from the FCC, law enforcement, and the industry traceback consortium. Should any traceback requests arise, we will coordinate with DIDWW to ensure timely and accurate responses, within the 24-hour time frame required by FCC regulations.

5. Conclusion

Allianz I Inc acts as a reseller and does not process or carry calls. The technical responsibility for robocall mitigation, including STIR/SHAKEN implementation, rests with DIDWW, our service provider. We have verified that DIDWW complies with all FCC regulations regarding robocall mitigation. Our role is strictly administrative, involving billing and customer support.

We certify that Allianz I Inc will cooperate fully with any traceback requests and has no direct involvement in call traffic or its mitigation.

Yours sincerely,

Name: Hemal Mewada
