

QuikStart LLC,

3857 Birch St #25

Newport Beach Ca 92660

Telephone: 1-800-557-5192

Email: Info@quikstartllc.com

Ownership Structure:

Quikstart LLC, is a corporation managed by two directors, Sarvenaz Moarefian and Sania Hashempour, each holding an equal 50% share of the company.

There are no parent companies or subsidiaries. Quikstartllc is independently owned and operated in compliance with applicable FCC regulations, and all voice service offerings.

Quikstart LLC, is committed to preventing unlawful robocalls through the implementation of a comprehensive Robocall Mitigation Program. This program includes the following key components:

1. **Call Authentication:** We are in the process of fully implementing the STIR/SHAKEN framework for call authentication across our network to verify the authenticity of caller IDs for all traffic passing through our systems.
2. **Call Blocking Technology:** We employ advanced call analytics to detect and block illegal and unwanted robocalls. This includes monitoring and flagging suspicious patterns such as high call volumes from a single source and calls with unassigned, invalid, or spoofed numbers.
3. **Traffic Monitoring:** We continuously monitor call traffic across our network to identify and mitigate potential robocall patterns. Any suspicious activity is flagged for further investigation and, when necessary, corrective actions are taken.
4. **Inter-carrier Coordination:** We collaborate with upstream and downstream carriers to track and eliminate unlawful robocalls. We share data and cooperate with other service providers to prevent malicious actors from exploiting the network.
5. **Customer Support and Education:** We actively educate our customers on how to identify and report suspicious calls. We offer tools and resources that help customers protect themselves from robocalls, such as caller ID verification services and robocall blocking features.
6. **Compliance with FCC Guidelines:** Our program is compliant with all applicable FCC regulations, including registration with the Robocall Mitigation Database. We regularly review and update our policies and procedures to align with new guidance from the FCC and industry best practices.

Through these measures, we aim to minimize the occurrence of illegal robocalls and protect consumers from fraudulent activities.

This description outlines the necessary steps and efforts that QUIKSTART LLC, can take to address the FCC's robocall mitigation requirements.
